JIRA Connection-User Stories to Tests

Need to add "Connect Jira" button to establish the connection

Base url
Email id:
Jira API key
implement the same

12:56 PM

Completed 4 steps in 27s +4 -19

Updated the **Connect Jira** UI to use only the three fields you specified: **Base URL, Email ID, and Jira API Key**. The project-key field has been removed. The form submits those credentials to the frontend's expected Jira API endpoint and can display stories returned by that endpoint.

The frontend build passes. **A working connection to Jira still requires a backend Jira endpoint**; I did not modify the backend.
